1. Introduction

2. Congratulations! The Brooklyn Bridge II Roon Core is **an all in one music marvel; a Streamer** which combines a stellar mastering quality **DAC** with **Roon**, the best playback software and hardware available , a fully functional **analog/phono and digital preamp** and state of the art **headphone amp** with balanced drive capability. Brooklyn Bridge is a **software platform** that will grown overtime with added functionality of multiple, **other streaming, playback and dsp processing options** provided through easy periodic online software upgrades.

3. Contents of the Package

- The Mytek Brooklyn Bridge II Roon Core (BB II)
- Power Cord
- 2 Wifi antennas
- USB 2.0 cable
- Quick Startup Guide
- 1-year free Roon subscription coupon
- Infrared Apple Remote (not recommended) is optional and can be purchased as separate accessory from Mytek or from any third party.

Infrared Remote - The BB II is designed to be remotely operated from the smartphone or tablet with a Roon Remote App (and other Playback apps) and the Mytek BBII App (same as front screen which can be repeated on the smartphone/tablet). Optionally an infrared apple remote can be used for simple functionality as indicated on the picture. Press MENU+SKIP to pair w. BBII (till logo flashes) More in Chapter 16.

3. Device Installation

4.1. Power the device using the provided power cable.

4.2. Affix the two Wi-Fi antennas to the device. The sequence of attachment is non-specific.

4.1. Connect your speakers to the Brooklyn Bridge II, choosing from the available outputs suitable for your speaker system:

a. Line Audio Output, use two cinch cables: one for the left channel and another for the right channel.

b. Balanced Audio Output, employ two XLR cables: one for the left channel and another for the right channel.

To achieve the best system performance, we recommend the exclusive use of high-quality cables from Mytek Audio. This ensures the listening experience as intended by our designers. Inquire with your retailer for further details.

4. Initial Setup and Configuration

4.1. Press and hold the volume button until a clicking sound is heard. Following the click, wait for the device to initialize until the main menu is displayed on the screen.

4.2. Connect the Brooklyn Bridge II to your local network:

a. For a wired connection, directly connect the streamer to your router with an Ethernet cable.

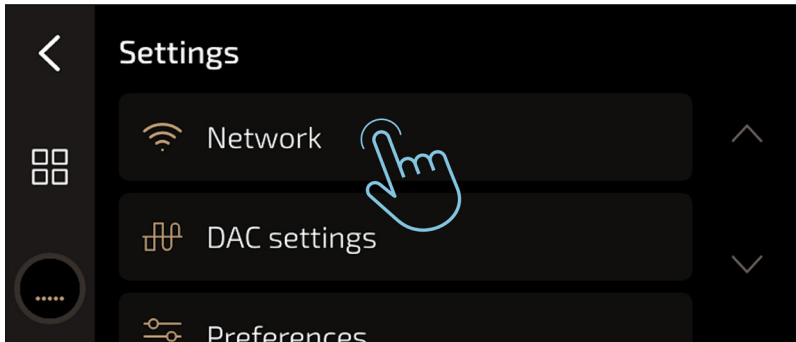

b. For a wireless connection:

- Navigate to the 'Settings' icon located in the top right corner of the screen.

- Select the 'Network' option and locate your Wi-Fi network's name.

- Enter your Wi-Fi password using the on-screen virtual keyboard.

- A 'Connected' status should appear under the selected Wi-Fi network upon successful connection.

Now you can go back to Brooklyn Bridge's II main menu and move on to Roon account configuration.

5. Using Brooklyn Bridge II as external Roon Core

If you are already familiar with the Roon service and have an ecosystem based on Roon Core, you can connect the Brooklyn Bridge II as one of the endpoints to your existing Core. To do this, follow the instructions below:

5.1. Setting up Brooklyn Bridge II as a external Roon Core

- Navigate to the 'Settings' icon located in the top right corner of the screen.

- Select the 'Preferences' option and had down to Roon Core option, then select it

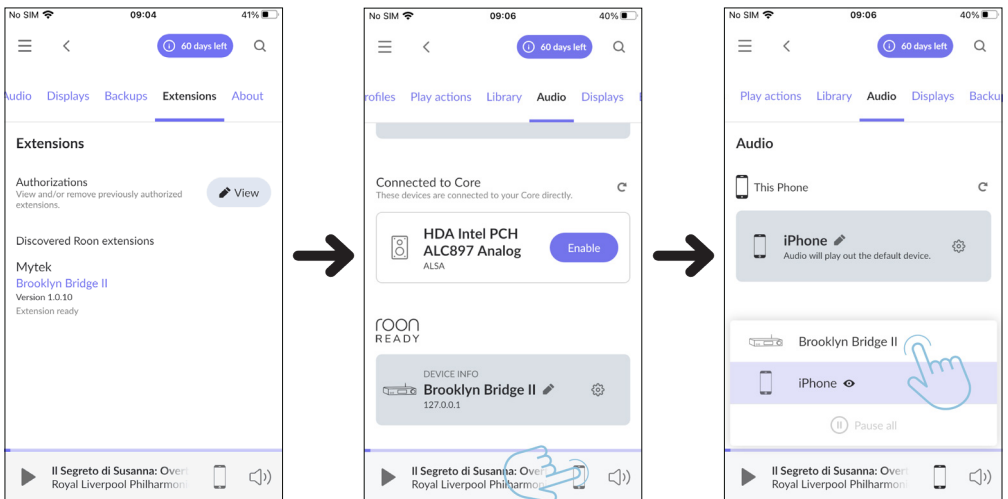

- In Roon Core settings choose External Roon Core

5.2. Adding Brooklyn Bridge II as endpoint in Roon App.

- Perform the exact steps as in paragraph 8. If you have enabled Brooklyn Bridge II in extensions and audio settings then BBII should appear in your endpoint devices.

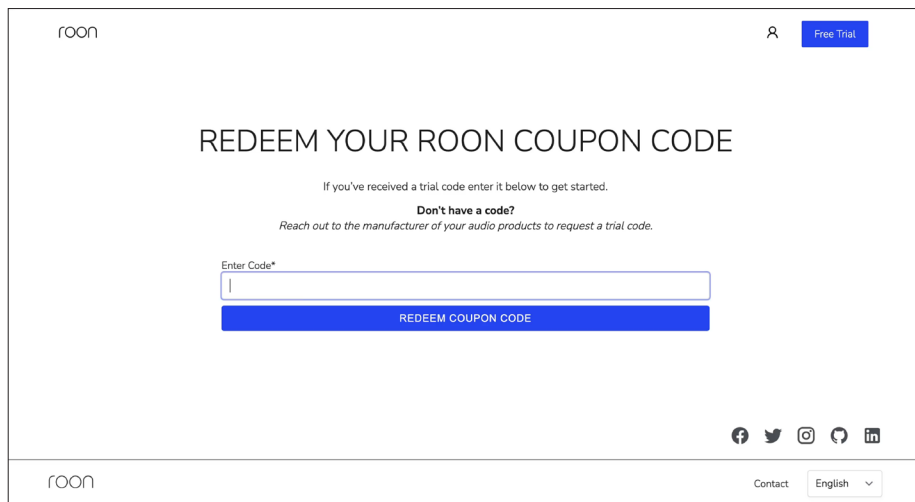

6. Account creation and code redemption

6.1. Visit the Roon account creation page at [<https://account.roon.app/en/coupon>]. Or scan a QR code below:

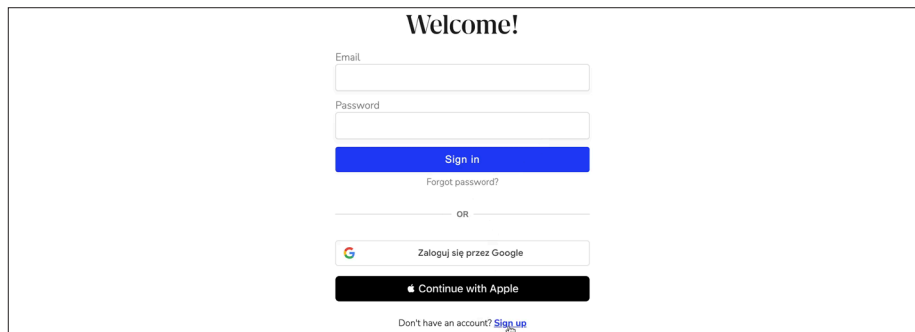

6.2. Enter the voucher code provided in your package.

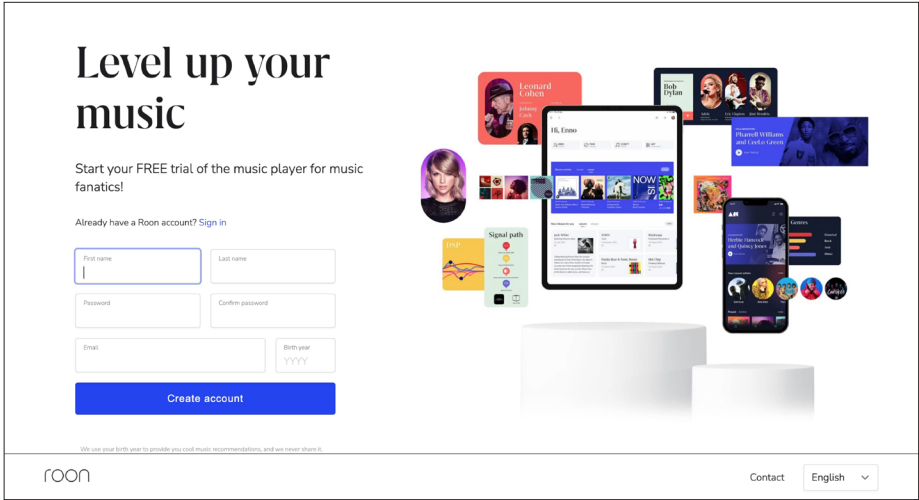

The screenshot shows the Roon account creation page. At the top left is the 'roon' logo, and at the top right is a search icon and a 'Free Trial' button. The main heading is 'REDEEM YOUR ROON COUPON CODE'. Below it, there is a sub-heading: 'If you've received a trial code enter it below to get started.' Underneath, it says 'Don't have a code?' and 'Reach out to the manufacturer of your audio products to request a trial code.' There is a text input field labeled 'Enter Code*' and a blue button labeled 'REDEEM COUPON CODE'. At the bottom right, there are social media icons for Facebook, Twitter, Instagram, YouTube, and LinkedIn. At the bottom left is the 'roon' logo, and at the bottom right are 'Contact' and 'English' (with a dropdown arrow) links.

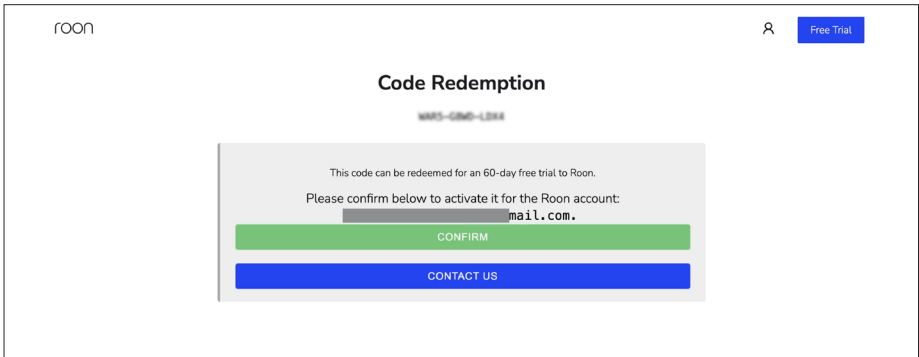

6.3. Sign in to your existing Roon account or sign up for a new one by providing the required credentials.

The screenshot shows the Roon 'Welcome!' sign-in page. At the top is the heading 'Welcome!'. Below it are two input fields: 'Email' and 'Password'. There is a blue button labeled 'Sign in'. Below the button is a link for 'Forgot password?'. Underneath is the word 'OR'. There are two more options: 'Zaloguj się przez Google' (with the Google logo) and 'Continue with Apple' (with the Apple logo). At the bottom, there is a link: 'Don't have an account? [Sign up](#) Go'.

6.4. Redeem your 1-year free subscription and confirm.

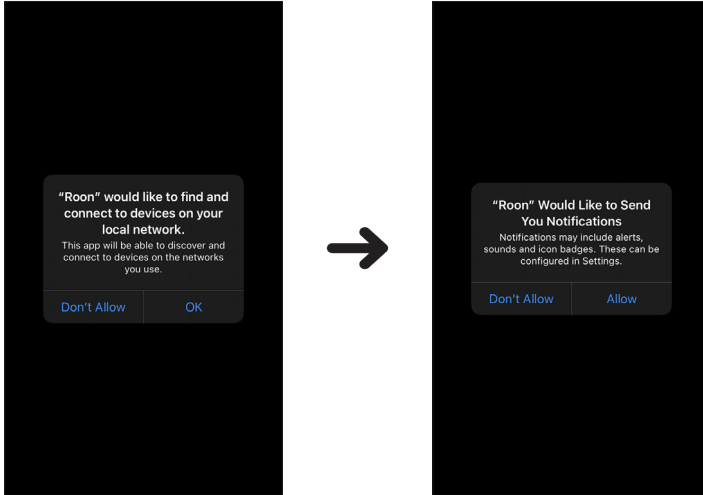

7. Roon App Installation and Setup

7.1. Download the Roon app for desktop or Roon Remote for mobile device from the official website: [<https://roon.app/en/downloads>]. Or scan a QR code below

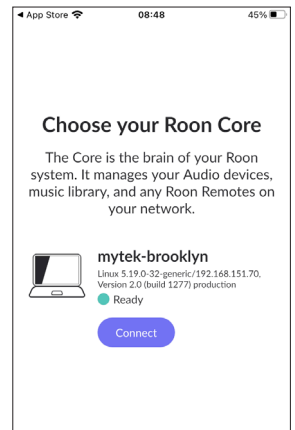

Next, you need to log in and configure the Roon app. The following steps were performed using the Roon Remote app on an iPhone. The configuration process is very similar for other devices, but keep in mind that it may not be identical in every aspect.

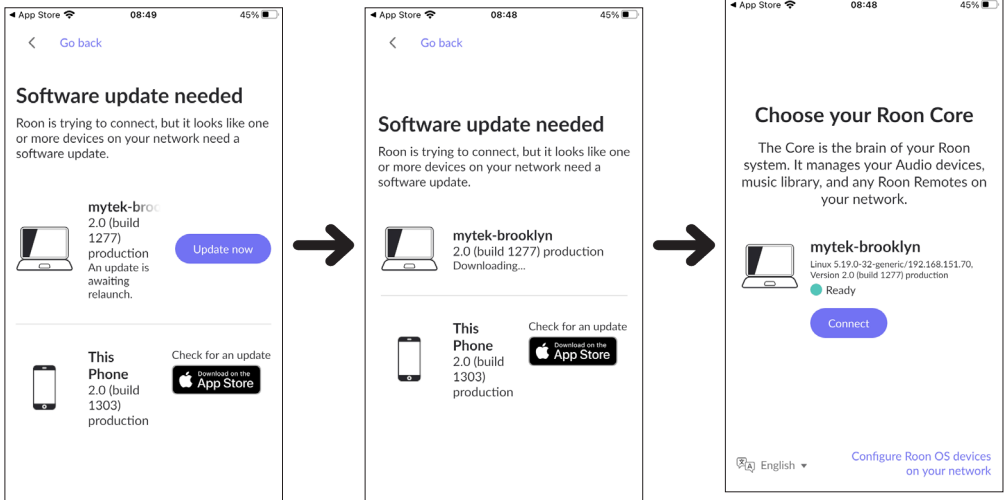

7.2. Launch the Roon app. During the initial startup, grant the app necessary permissions for notifications and local network access for full functionality.

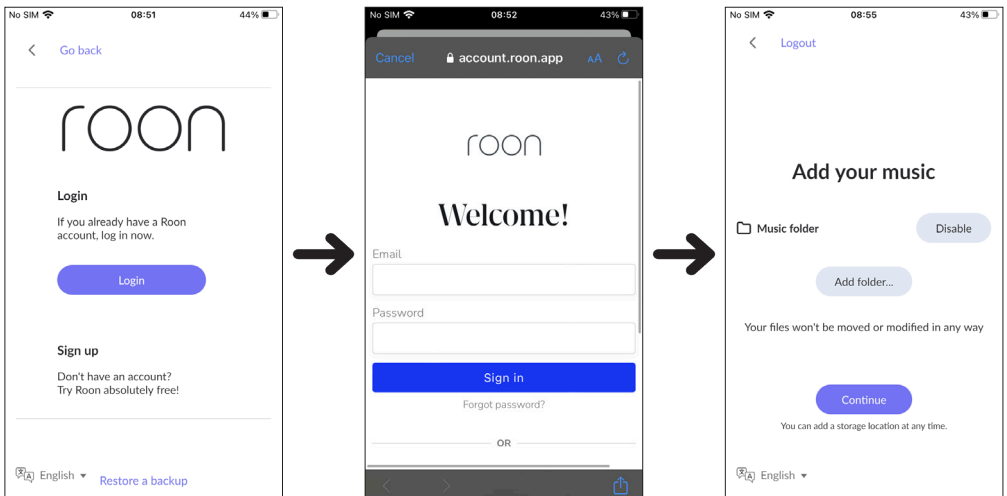

7.3. Select your Brooklyn Bridge II Roon Core from the list of available devices. It should appear as 'mytek-brooklyn'.

7.4. If an update is required for the Roon Core, you will be prompted with an 'update now' notification. Proceed with the update and await its completion.

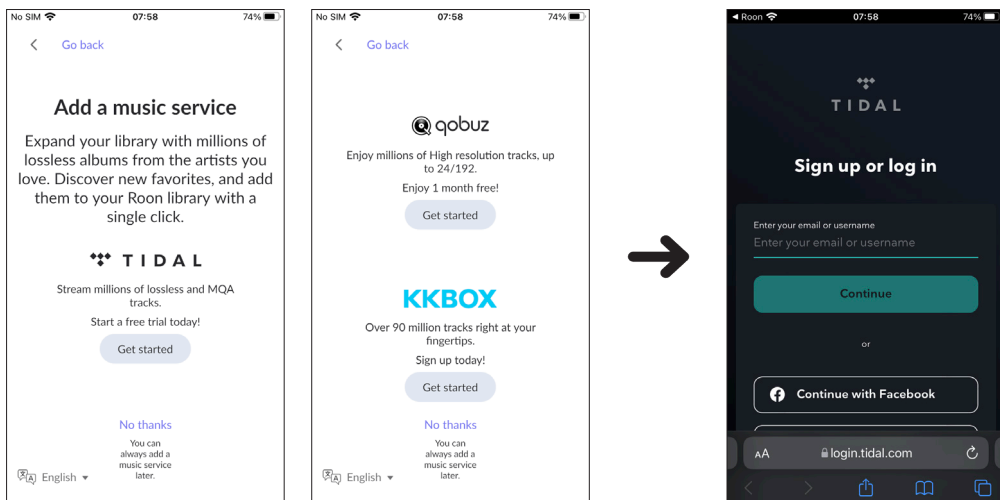

7.5. Log into your Roon account using a valid license. Upon successful login, you may encounter a screen inviting you to add music to your library from your personal cloud storage. This step is optional and can be skipped if not desired.

For detailed guide how to setup your own music library head to the paragraph 8 on page 16.

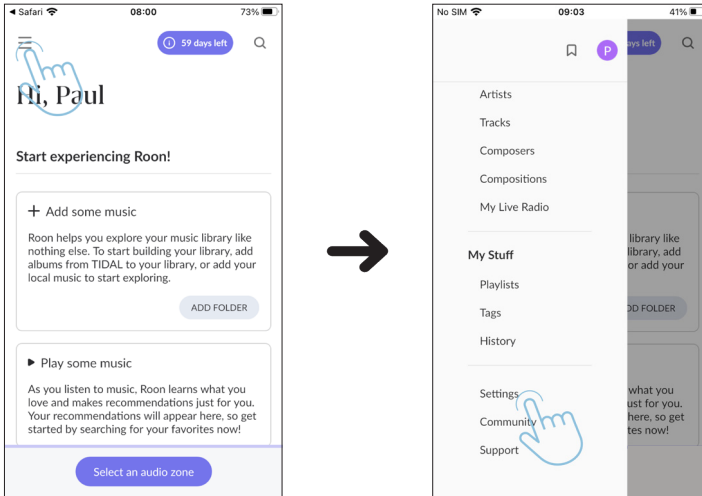

7.6. Next, connect to your preferred streaming service, such as Tidal. Click the 'Get started' button which will redirect you to the Tidal login page. Enter your Tidal credentials to link the service to your Roon account.

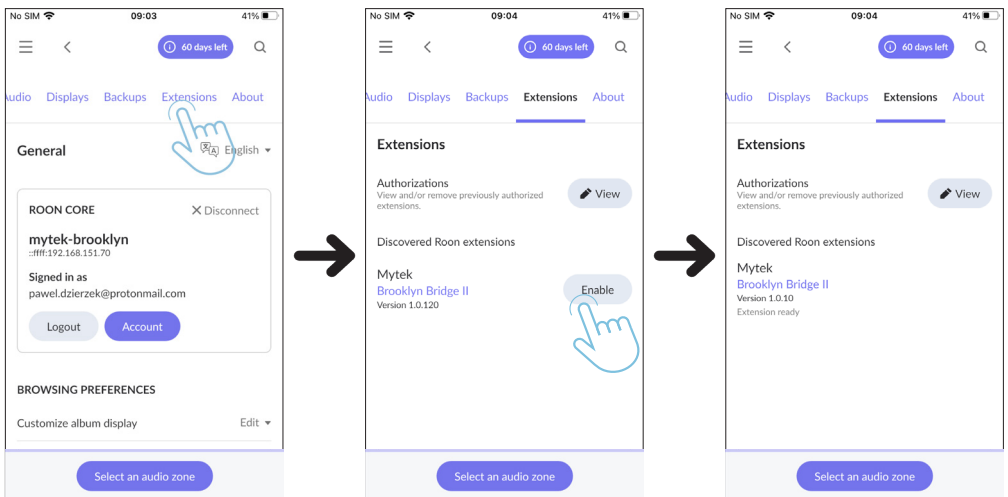

With the Roon app now set up on your device and the streaming service connected, the final step is to link the app with your Brooklyn Bridge II streamer.

8. Connect the Brooklyn Bridge II to the Roon App

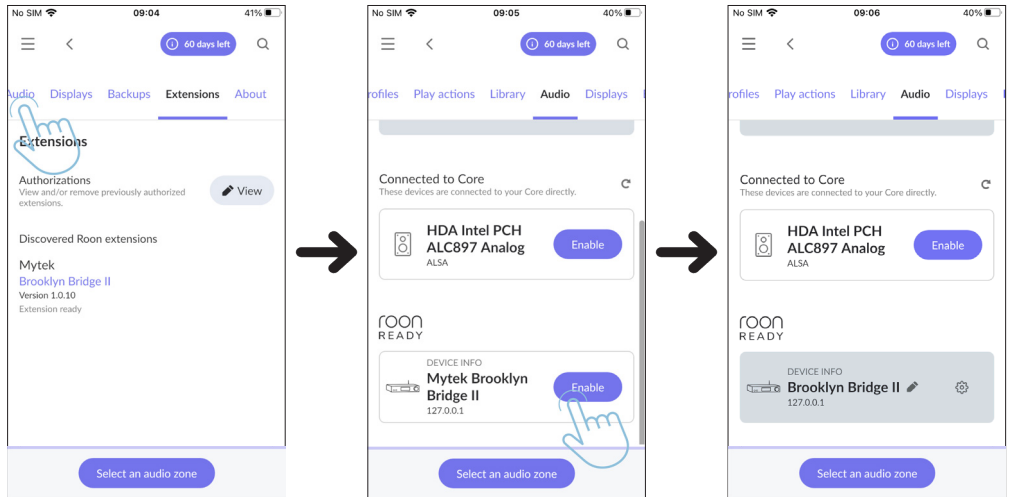

8.1. Access the app's menu on the top left corner of the screen and choose the 'Settings' option.

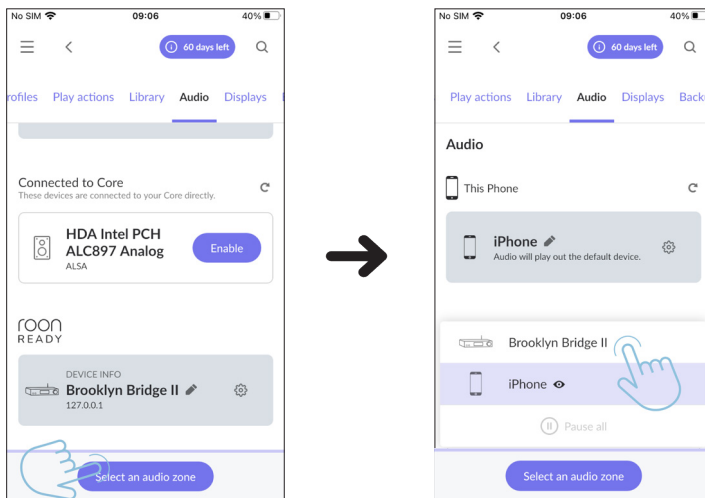

8.2. Navigate to 'Extensions' and ensure it indicates 'Extension ready' or proceed with the 'Enable' option if necessary.

8.3. In the 'Audio' menu, locate Mytek Brooklyn Bridge II device from Roon Ready section and select 'Enable'.

8.4. Select the correct audio output using the 'Select an audio zone' option at the bottom of the screen.

Now you can listen music through Brooklyn Bridge II streamer using your favourite streaming service. If you want to listen your own music from your personal library you should move on to the page 22.

9. Using Brooklyn Bridge II with external DAC

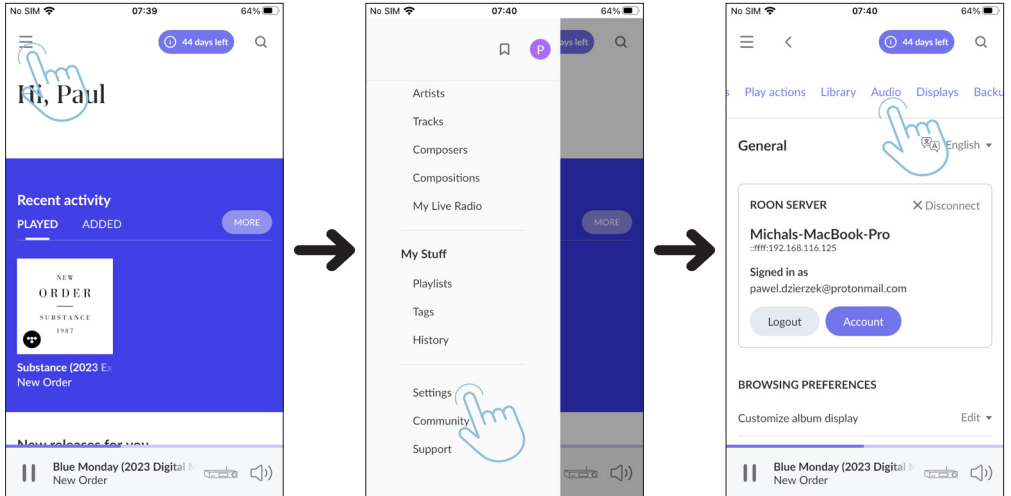

Our device is equipped with what we believe to be some of the best DACs (Digital-to-Analog Converters) available on the market. However, if for any reason you wish to use your previous DAC, or if you're interested in comparing both devices, such an option is also possible in this streamer. Below is a guide outlining the steps to stream music from Brooklyn Bridge using an external digital-to-analog converter.

9.1. Connect external DAC using USB cable and plug it into Brooklyn Bridge's USB 3.0 port. Make sure that both devices are turned on.

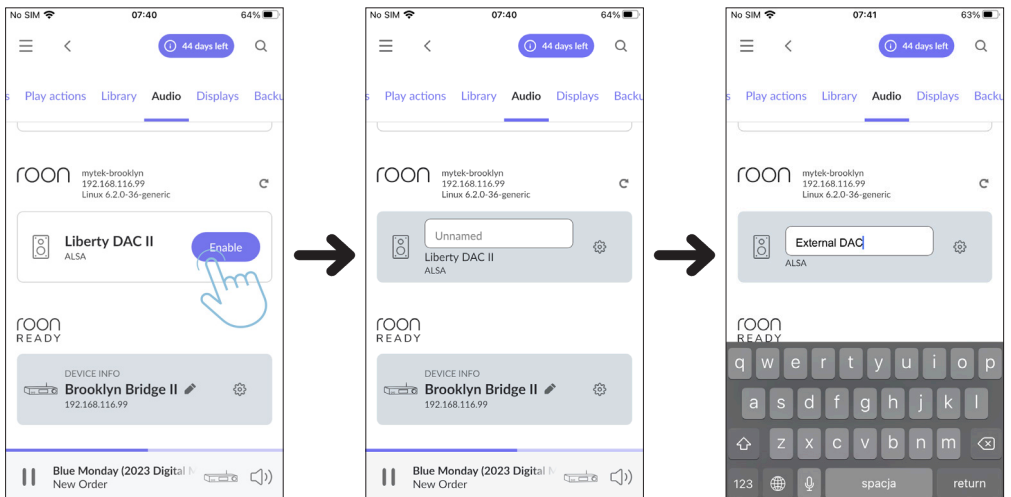

Remember, if you want to stream music from the BBII using an external DAC, Brooklyn Bridge must be set in the default 'built-in Roon Core' mode. If you previously switched the function to External Roon Core, you will need to revert to the previous mode using the instructions in paragraph 5.

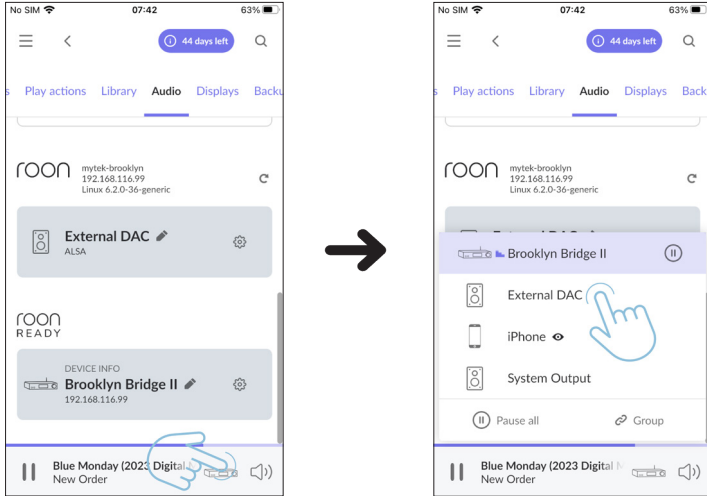

9.2. In Roon head to settings menu and choose 'audio' option

9.3. In Audio option slide down until you see your external DAC, click on 'enable'. You can also name it if you want.

9.4. Select your DAC as your endpoint device.

Now, your music will be streamed through the Brooklyn Bridge II and transmitted to your speakers via an external DAC.

10. Roon introduction and usage guide

The Roon service is the answer for the most demanding audiophiles who like to have everything at their fingertips in one app. From within the app, users can access their favorite streaming services and create their own music libraries from their private collections. Roon also boasts an extensive database about most well-known musicians and bands. With Roon, you can not only enjoy music in the best quality but also read about your favorite artists, stay up-to-date with the latest music world news, and follow the activities of individual musicians from various bands. Therefore, we recommend familiarizing yourself with all the features and capabilities of Roon, for which instructional videos can be viewed on the Roon Labs main page on YouTube.
